What is the Gross profit of Airlines in 4 years?

Here, I am using the Bar chart to compare the Gross Profit of Airlines reported for all companies in 4 years.

The Mean for year 1 is \$12.4b and it is increased to \$13.5 b in year 2 and year 3 is \$17.9b and finally it is above at \$19.4 b in year 4. The mean of Gross profit for year 2 to year 3 is increased considerably up to \$4b.

However, the Median for year 1 is \$14.3b and year 2 is \$15.7b and year 3 is \$22.2b and year 4 is \$23.6b. The median for all year is higher than mean value ,it shows that many company's gross profit is greater than the mean(average) value.

The Standard Deviation for year 1 is \$6.7b and year 2 is \$7b and it increased to \$9.6b in year 3 and \$10.5b in year 4. All the company's gross profit data is close to the mean value in all years because ,standard deviation is less than mean value

The Range for year 4 is \$26.2b which is \$10b more than year 1.
